

## **My Cover Letter**

Hello!

I'm currently studying front-end development and have a passion for good user stories. I have a solid foundation in HTML, CSS, and vanilla JavaScript, and I enjoy building clean, simple, and user-friendly interfaces. I'm eager to learn more, contribute to real projects, and grow as a developer.

I work well independently and in teams, and I'm always motivated to improve my skills. Thank you for taking your time to read my cover letter and considering my application. I would love the opportunity to show you what I can do.

Best regards,  
Murtada Al-Obaidi.
